A PRECISION REFINEMENT PASS — WORDMARK · MARK · HIERARCHY

THREE FIXES, NOTHING RESET

# Wordmark — slightly more ownable

BEFORE

Mộc Diện

REFINED FONT · +5% TRACKING · ROUND DOTS

AFTER

Mộc Diện

TIGHTENED TO +3% · SQUARED DOT SYSTEM

### Squared dots

The i-tittle and both dấu nặng become precise squares — echoing the mark's geometry. One structural idea makes the Vietnamese marks the signature.

### Tighter set

Tracking eases from +5% to +3% and the word-space is optically balanced, so it reads as a drawn logotype, not spaced-out type.

### Untouched

Same Spectral serif mood, same weight, same readability and calm. The carets and letterforms are deliberately left alone.

# The squared-dot system

I – TITTLE

Mộc Diện

Ộ – DẤU NẶNG

Ệ – DẤU NẶNG

Every dot in the wordmark is squared to the same rhythm — the rectangular language of the surface mark, carried into the type. It is invisible at a glance and unmistakable once seen: the kind of quiet decision that signals a real identity rather than a chosen font. The circumflex carets keep their natural form, so the move never reads as a gimmick.

# Surface mark — one finished system

BEFORE

UNEVEN RECEDE · DECORATIVE GOLD TIP · READS AS SEPARATE BARS

AFTER

CONSTANT STEP · BINDING KERF · EXPOSED CUT EDGE

### Disciplined step

Each layer recedes by exactly the same amount, so the right side reads as one clean cut edge instead of random bars.

### Binding kerf

A single vertical kerf passes through every stroke — tying them into one finished surface system, not a stack of slats.

### Integrated accent

The gold tip is gone. Ochre now marks only the exposed sliver of cut on the face — colour with a reason, never decoration.
